

REPORTING AT JOHNSTOWN.

EXPERIENCES OF THE MEN WHO RENT THE NEWS FROM THURSDAY.

The difficulty of getting to the scene of disaster—how the reporters slept and ate and their difficult work.

that which the Sun had and others offered for private messages remained in waiting order. If even a wire was passed over it was expected to go, as the others had done, and with it would go the last chance of getting news from the scene.

AN EXPERT ON ELECTRICAL KILLING.

Dr. Rockwell thinks that 1,000 Volts Would Kill Instantly Without Mutilation. Dr. A. J. Rockwell, one of the experts who recently attended the experiments at Edison's laboratory to determine the effect of various currents upon living animals, has expressed a decided opinion that the proposed use of 1,000 volts of electrical force would be quite sufficient to cause death without mutilation of the subject.
